

UROLIFT®

Open up to a new BPH treatment

UROLIFT®
BPH Relief. In Sight.™

Without cutting, heating or ablating

The UroLift® System is a unique minimally invasive alternative to major surgery for the treatment of BPH. The procedure may be done in an outpatient setting and often local anesthesia is used.

- Immediate, visible result¹
- Rapid symptom relief¹
- Recommended by NICE
- Preservation of sexual function¹
- Typically no catheter required after treatment¹

Most common adverse events reported include hematuria, dysuria, micturition urgency, pelvic pain, and urge incontinence. Most symptoms were mild to moderate in severity and resolved within two to four weeks after the procedure.
